

# WaterCalc™ 1.0

# Licensing Options

The WaterCalc™ 1.0 software was developed in response to numerous customer requests for a water/liquid piping calculation tool similar to our popular natural gas related products. It is a suite of analytical tools for water system design and analysis. It includes routines for calculating a variety of stress, flow, and pressure values for devices and pipe associated with virtually any pressurized piping application that transports or delivers water or similar liquid.

The software is available in the following licensing configurations.

LICENSE OPTIONS	
LICENSE TYPE	DESCRIPTION
<b>Demonstration</b>	A full featured, time limited version of the software. Available for download from our website <a href="http://www.b3pe.com">www.b3pe.com</a> .
<b>Evaluation</b>	A full featured, extended time limited version of the software. Available upon request for approved Users.
<b>Single User License</b>	Provides full access for a single User in a stand alone or concurrent “network” installation. With the exception of the Enterprise and Corporate Licenses, one Single User License is required for each concurrent or simultaneous User.
<b>Enterprise License</b>	Provides full access for an unlimited number of Users in a stand alone, “network”, or combination installation for a single operating company. For example, if a number of operating companies are owned by a single holding company, with the exception of the Corporate License, one Enterprise License is required for each operating company. This license is intended for a single operating company with multiple Users. The Enterprise License is more cost effective than multiple Single User Licenses when more than seven (7) Users will be using the software in a single operating company.
<b>Corporate License</b>	Provides full access for an unlimited number of Users in a stand alone, “network”, or combination installation at unlimited locations. This license is intended for use by multiple operating companies owned by a single holding company. The licensee is the holding company. The Corporate License is more cost effective than multiple Enterprise Licenses when more than three (3) operating companies will be using the software.

The WaterCalc software is distributed on CD or by way of electronic download. The software requires a computer configured to run Windows™ XP or newer. The terms of the Enterprise and Corporate licenses allow the User to make multiple copies of the installation software and documentation, and to allow the software to be installed on multiple machines as defined by the limitations of the license.

Purchase of a license provides authority for perpetual use of the software, to the extent that the software will operate unmodified on future operating systems. An annual maintenance fee may be applied for custom installations or in cases where a non-standard license agreement is used, otherwise no annual maintenance fee is required. Updates to the software are available for download at no additional charge from our website. Technical support on the use of the software is provided by way of telephone or email communication at no additional fee.

Please complete the following form so that we may accurately process your order. Email or fax the completed form.
