Bradley B Bean PE

Engineering And Software For The Natural Gas Industry

March 2020

COVID-19 - B3PE Contact Info

We are still here to help. At this time, the best way to contact us is via email.

- Technical Support help@b3pe.com
- Sales Support sales@b3pe.com
- Brad bbb@b3pe.com
- Doug dee@b3pe.com

Our office phone remains available at (719) 578-9391. If we are not able to answer, please leave a message and we will get back to you as soon as possible.

For urgent requests, you can call Brad on his cell phone (719) 339-0636.

From all of us at B3PE, we wish good health to you and your families during this challenging time.

Check Out The GASCalc Web App

Working from home? For those who do not have access to their work computers, but need to perform design and engineering calculations, try the GASCalc Web App.

The Web App is a free program that offers a select number of calculations from the full suite of tools included in GASCalc. You do not need to purchase a license for GASCalc in advance. Registration is open to anyone with a valid email address, from any web-enabled device running a modern browser.

We just completed an update to improve the look, feel, and user experience of the Web App. Visit www.gascalcapp.com to register for access, and try it out for yourself.

Training Update

Due to the restrictions associated with the coronavirus outbreak, we have cancelled our April training course.

Our next Basic GASCalc™ and GASWorkS™ training course is scheduled for **June 17-19, 2020**. There is another course planned for **September 16-18, 2020**. These courses will be held at our world headquarters in Colorado Springs, Colorado. GASCalc training will occur on the first day of each session (Wednesday), and the last two days will be focused on GASWorkS (Thursday and Friday). You are welcome to attend the GASCalc portion only, the GASWorkS portion only, or both together. Space is limited, so submit a registration form and reserve your spot today.

More information can be found on the Training Information page of our website, such as an overview of our training courses including details on travel and accommodations.

We can also conduct specifically tailored courses to meet your individual or group needs. Additional courses can be held at our site or at yours upon request. Please contact us at training@b3pe.com to discuss your specific training needs.

GASWorkS 10 - The Viewer

For anyone interested in a "view-only" version of GASWorkS, the GASWorkS Viewer is now available. The Viewer is a standalone program that works just like the full version of GASWorkS, only without the ability to edit or save a model.

Users can scroll or zoom to different parts of the model. Text items showing model data can be turned on or off. Search for specific features using the *Find* commands. The various reporting features are accessible, including the ability to create selection sets, and print reports.

The Viewer is only compatible with GASWorkS 10 models. Models built in GASWorkS 9 and earlier will need to be imported into GASWorkS 10 first before they can be opened by the Viewer.

There is no additional cost for the Viewer. Download the setup file from our Demo Software page to install the Viewer.

Don't forget to keep your GASWorkS 10 up-to-date. Visit our Updates page to download the latest revision, posted on **March 6**.

If you have not already tried GASWorkS 10, click here to request a 30-day evaluation copy. To upgrade today, fill out an order form and return it to sales@b3pe.com.

Our Products

GASWorkS™ - Affordable and robust network modeling.

GASCalc™ - Suite of gas system design and analytical tools.

GASPurge™ - Natural gas pipeline purging calculator.

StationManager™ - Regulator and relief valve station management solution.

WaterCalc™ - Suite of water system design and analytical tools.
